'It is important to welcome AI with an open mind, but to remain critical about how and under what circumstances we deploy it in social security.'

SAFETY AND QUALITY

'the impact of using AI in our decisions is very profound, therefore verification before use is indispensable.'

'AI applications in social security should follow the same strict regulation as for the approval of medicines and authorisation of medical devices.'

AI is a tool; all tools should have a quality check before being implemented.'

RISKS OF BIAS AND DISCRIMINATION

- In your opinion, what are the main ethical/legal challenges to the adoption of AI in your field of work?

-Discrimination, unfair outcomes
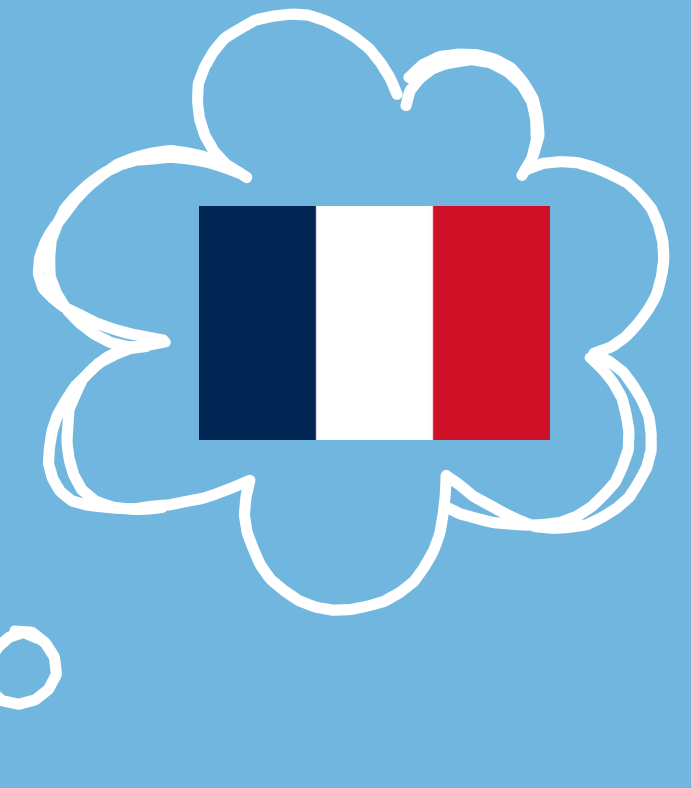

RISKS OF BIAS AND DISCRIMINATION

'Artificial intelligence, if wisely and well organized, according to law and ethical standards, may help us achieve more equal decisions on benefits.'

TRANSPARENCY

'C'est toujours utile de mieux connaitre ses potentiels ennemis...

(it is always useful to better know you potential enemies)'

TRANSPARENCY

'People need to know and must be aware what the abilities, but also the shortcomings of AI are, in order to use it in the right (and ethically correct) way in their work.'
