

UPPSALA  
UNIVERSITET

Early multidisciplinary assessment  
resulted in  
longer periods of sick leave.

## Flow chart of participants in the study

## Result of the intervention

	Intervention (n=18)	Control (n=15)	
Still on sick leave after 3 months	7/18	3/15	p=0.283
Total number of sick leave days in the first three months mean	58	36	p=0.038
